Indonesia, ID | P: +62 82245101283 | asraf.muhammad07@gmail.com | [linkedin.com/in/asrafmi](https://www.linkedin.com/in/asrafmi) | github.com/asrafmi | <https://asrafmi.vercel.app>

Full-Stack Engineer with **4+ years** of experience delivering measurable results, from a **54% performance** uplift on a national logistics platform to geospatial dashboards used by the Indonesian Ministry of Home Affairs. Comfortable owning features end-to-end, **leading** small engineering teams, and working across the full stack from database to UI, even hosting and deployment.

WORK EXPERIENCE

CV. Solusi Teknologi Kreatif - STK (Full Time) | Jakarta, ID

Technical Leader

Jan 2022 - current

- Led 8 engineers to build Satria Muda Indonesia, a national martial arts organization platform featuring real-time digital scoring, event management, and asset management using **Next.js**, **NestJS**, **PostgreSQL**, and **Websocket (Socket.io)**.
- Led 4 engineers to build Hemdal, a B2B SaaS media monitoring platform with real-time social media and article listening, AI sentiment analysis, and Elasticsearch-powered search using **Next.js**, **NestJS**, **MySQL**, and **Elasticsearch**.
- Led 4 engineers to build a Smart Room Booking system for DPR Republik Indonesia (Indonesian Parliament) with real-time room management using **Next.js**, **NestJS**, **WebSocket (Socket.io)**, and **MySQL**.
- Optimized SSR and web performance for Lion Parcel's website, achieving a **54.2%** increase in Lighthouse performance score and **9.89%** SEO improvement using **Node.js**, **Express**, and **Vue.js**.
- Built internal tooling including a Telegram-based system monitoring bot (**Python**) and a face recognition attendance system Built internal tooling including a Telegram-based system monitoring bot (Python) and a face recognition attendance system (**React**, **NestJS**) that has payment processing feature using **Midtrans**.
- Setup CI/CD pipelines using **Drone.io**, **Gitea actions**, **Docker**, and **Kubernetes**.
- Recognized as **High Achiever** (1 of 13) at STK in late 2025, awarded for stepping up beyond assigned scope, driving initiatives proactively, and consistently pushing past the status quo.
- Built License API Service using **Go (Fiber)**, **MySQL**, and **GORM**.
- Conduct code reviews to colleague and implement clean code.

Ministry of Home Affairs Indonesia Republic - SIPD (Project Based - Staffed via STK) | Jakarta, ID

Fullstack Developer

Jan 2025 - Dec 2025

- Developed geospatial distribution maps for national priority programs (MBG, 3 Million Free Housing, Zero Tax), deployed across **500+** regional governments under the Ministry of Home Affairs using **React Leaflet**.
- Built interactive policy monitoring dashboards for minister-level stakeholders, visualizing program implementation across regions using **React.js**, **Tailwind CSS**, and **Chakra UI**.
- Handling end-to-end data integration, from writing **PostgreSQL** queries and backend data preparation using **Go (Fiber)** to frontend consumption and visualization.
- Assisted in deploying a helpdesk application used by **500+** regional governments, managing containerized deployment using **Docker Compose** on on-premise servers.

PT. Telkom Indonesia - Apilogy.id (Project Based - Staffed via STK) | Bandung, ID

Fullstack Developer

Aug 2022 - Dec 2024

- Revamped the user management service UI, resulting in an **81.9%** increase in SUS score, **30%** more informative content, and **53%** improvement in visual impression using **Vue.js** bundled with **Webpack**.
- Implementing a new homepage design for apilogy.id based on the UI/UX team's prototype using **React.js**, **Next.js**, and **Tailwind CSS**.
- Fix 5+ security issues that reported from penetration test team
- Create 15+ unit test and create 5+ integration test on user management service using **Jest** using **Cypress**.
- Collaborate with Backend to integrate API and also Collaborate with Frontend to provide data.
- Conduct code reviews to colleague and implement clean code.
- Create CI/CD pipelines using **Jenkins** and **Drone.io** for deployment.

WORK EXPERIENCE

PT. Produkzilla Akademi - Productzilla (Project Based - Staffed via STK) | Bandung, ID

Fullstack Developer

Aug 2022 - April 2024

- Understanding business process and implementing new design web page from UI/UX Team, resulting in an **90.5%** increase in SUS score, **36.4%** more informative content, and a **59.6%** improvement in visual impression, using **Vue JS** bundled with **Webpack** for user management service.
- Providing backend service for e-Election using **Nest JS (Typescript)** and also implement figma mockup from UI/UX team using **React JS, NEXT JS, and React Query**.
- Create e-Election Mobile App using **React Native (Typescript)**.
- Building backend and front end service using **Docker** containerization and docker compose.
- Create CI/CD pipelines using **Drone.io** for deployment.
- Teaching, mentoring, and giving task for 5+ students on Short Class Web Development using **React JS**

PT. Solusi Kebutuhan Teknologi (Freelance) | Jakarta, ID (Remote)

Fullstack Developer

Apr 2024 - Jul 2024

- Create 3+ new feature on Warehouse Management System.
- Bug fix 5+ features on Warehouse Management System.
- Making enhancement on 15+ features on Warehouse Management System, either on website or mobile application using **Angular JS, Express JS, and MongoDB**

FORMAL EDUCATION

Binus Online University

Information System - Bachelor Degree

3.92/4.0 (Ongoing)

Telkom University

Information System - Diploma 3

3.90/4.0 (Cumlaude)

NON FORMAL EDUCATION

AI Engineering Bootcamp, by Ruby Thalib

AI Engineer

Mar 2026 - Jun 2026

- Completed the final project with a score of **95/100**, building a multitenant **Retrieval Augmented Generation (RAG)** API.
- Learned the core LLM application stack: **document chunking, vector embeddings, semantic search with pgvector, prompt guardrails, and streaming responses**.

Backend Engineer - Productzilla Academy

Backend Engineer

Feb 2023 - June 2023

- Understanding the fundamentals of backend development using **Node JS**.
- Learning how to work with databases using Node.js, including CRUD operations and **MongoDB** database integration.
- Understanding how to handle asynchronous programming using promises and async/await in **Node JS**.

Bootcamp PKS Digital School

Data Science

Apr 2022 - Jun 2022

- Take Insight to increase sales of supermarket from collecting data, preparing data, processing data, and analyzing data with 92 final score using Python
- Take Insight to analyzing COVID-19 Growth from collecting data, preparing data, processing data, and analyzing data with 90 final score using Python

Bootcamp PKS Digital School

Fullstack Web Development

Oct 2021 - Dec 2021

- Create Film website (Admin-site) with the implementation of CRUD using **Laravel 6**
- Create Futsal Online Booking Website (Cust. and Admin-site) with the implementation of CRUD using **Laravel 6**

SKILL

Frontend: HTML, CSS, Tailwind CSS, Javascript (ES6+), React, Next.js, Vue.js, Angular.js, Redux, Vuex, Zustand, TypeScript, JavaScript, Tanstack Query, React Native, Chakra UI, Shadcn/ui, Material UI, Webpack

Backend: Node.js, Express.js, NestJS, Laravel, Python, Python FastAPI, Go, Go Fiber, Websocket, TypeORM, Prisma, GraphQL, REST API, Drone.io.

Database: PostgreSQL, MySQL, Supabase, MongoDB, Elasticsearch, Redis

AI / Data: Machine Learning, NLP, Web Scraping

DevOps: Docker, Docker Compose, Kubernetes, Git Actions, Gitea Actions, Jenkins, Drone.io, CI/CD, Ubuntu, AWS S3, EC2.

Tools & Others: Git, Postman, Figma (reading), Jest, Cypress, Claude Code, Github Copilot

Languages: Indonesian (Fluent), English (Quite well)

PROJECTS

Thesis AI Assistant

<https://thesis-ai-assistant.vercel.app/>

Create **SkripsiAI**, platform for creating Thesis that using AI Tool Built-in and automate formatting document using **Anthropic API** built with **NextJS Typescript, Tailwind CSS**, and **Supabase**

ChatGPT Clone

<https://github.com/asrafmi/chatgpt-messenger>

Create ChatGPT clone using **OpenAI API** built with **NextJS Typescript, Tailwind CSS**, and **Firebase**

Web Portofolio

<https://github.com/asrafmi/asrafmi>

Create portofolio website built with **NextJS, Tailwind CSS**, **Chatbot** using **Anthropic API**

Diabetes Prediction

<https://github.com/asrafmi/prediksi-diabetes-fixed>

Create Smart Website that can predict whether user has a diabetes or not using Python

Human Resource Information System (HRIS)

<https://github.com/asrafmi/hris-app>

Create HRIS Web App that contains 4 core features such as attendance, leave request, reimburse request, and payroll using **NextJS Typescript, Tailwind CSS**, and **Supabase**

Knowledge Base API (RAG)

<https://github.com/asrafmi/knowledge-base-api>

Create a multitenant RAG REST API with multiturn chat, where each tenant can switch LLM providers (Anthropic Claude, OpenAI, Gemini, or self hosted Ollama), built with **Python FastAPI, PostgreSQL (pgvector), Voyage AI embeddings**, and **Docker**.
